Field Name: FedAllocExpended
Row Name: Federal Allocation
Column Name: Expended
Year: 2006
Field Note:
As reported previously, the budget period has been transitioned from a federal fiscal year to a calendar fiscal year. Consequently, the annual reporting of budgeted, encumbered, and expended monies through September 30 is misleading in that we actually have another three months remaining in our calendar year budget cycle, so expenditures will appear less than they should while remaining money will appear greater.

Field Note:
Budgeted amounts are based on previous year's projections and do not correlate well with the actual budgeted amount because of the unpredictability of the actual award amount and program changes that occur.

TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2009
[SEC. 506(A)(1)]
STATE: AZ

1. State MCH Administration:
(max 2500 characters)

The Arizona Department of Health Services was established as the State Public Health Agency in 1973 under A.R.S. Title 36 and is designated as Arizona's Title V Agency. The Bureau of Women's and Children's Health (BWCH) and the Office for Children with Special Health Care Needs (OCSHCN) provide policies and standards development, comprehensive planning, community organization and development, training and technical assistance, and direct provision of screening, preventive and curative services and service coordination. Services provided through the Title V program include, but are not limited to, the statewide Newborn Screening, Universal Newborn Hearing Screening, High Risk Perinatal Services, community development, Community Grants Initiative, Family Planning, Hotline, Health Start, Medical Home Project, and Traumatic Brain Injury Project.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ 7,028,756
3. Unobligated balance (Line 2, Form 2)	\$ 394,791
4. State Funds (Line 3, Form 2)	\$ 17,892,553
5. Local MCH Funds (Line 4, Form 2)	\$ 0
6. Other Funds (Line 5, Form 2)	\$ 34,243,753
7. Program Income (Line 6, Form 2)	\$ 0
8. Total Federal-State Partnership (Line 8, Form 2)	\$ 59,559,853

9. Most significant providers receiving MCH funds:

County Health Departments and Non-Profits
Community Nursing Program
Family Resource Coordination Program
Family, youth, and consumer involvement

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	24,135
b. Infants < 1 year old	108,908
c. Children 1 to 22 years old	569,980
d. CSHCN	32,631
e. Others	9,642

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

OCSHCN uses Title V dollars to support the Family Resource Coordination Program (FRC). FRC helps link families to resources for CYSHCN, and children and youth with TBI or SCI. Bureau of Women's & Children's Health (BWCH) funds family planning services in 12 counties. Services include education, counseling, referral, and medical care to women of childbearing age. The High Risk Perinatal Program funds the transport of high risk pregnant women to appropriate medical centers for delivery, and provides in-home community nursing to enrolled families. The Health Start Program provides in-home prenatal outreach services through lay health workers to at-risk women and provides support, education, and advocacy services to the family until the baby is two years old.

b. Population-Based Services:
(max 2500 characters)

The teen pregnancy prevention program funds evidence-based programs with an emphasis on youth development. The Newborn Screening Program has fully implemented the expansion of the panel of disorders for which it screens and meets recommendations of the American Academy of Pediatrics and the March of Dimes. The program now screens for 29 disorders at birth, including hearing loss. BWCH is integrating the promotion of preconception health and preconception care into existing MCH programs to increase understanding of the importance of health prior to pregnancy and between pregnancies. Title V funding is used to fund community-based projects that address three Title V priorities: preventable infant mortality, injury prevention, and obesity and overweight.

c. Infrastructure Building Services:
(max 2500 characters)

OCSHCN uses Title V dollars to support efforts that provide training on family centered care to health and dental providers, and coordinate resident-in-training home visits. OCSHCN also uses Title V dollars to fund organizations to recruit, select, train and manage families, youth and consumers to provide input into programs and projects and to participate in decision making at all levels. The Injury Prevention/Emergency Medical Services for Children Program is leading an initiative to determine the feasibility of establishing a statewide voluntary pediatric designation system for hospital emergency departments. Stakeholders working on this initiative include hospitals, EMS providers and others who have an interest in this concept. Stakeholders will identify basic, intermediate and advanced equipment, training, and facility requirements aimed to improve the care of children in Arizona. BWCH uses Title V dollars to support assessment, data analysis, and program evaluation activities. The BWCH Office of Assessment and Evaluation leads the Child Fatality Review Program, produces annual reports and factsheets, provides maternal and child health epidemiology and injury epidemiology, provides leadership in grantwriting, and conducts evaluation of BWCH programs. BWCH uses Title V funds to support the women's health policy advisor to the Governor. The policy advisor, located in the Governor's Office for Children, Youth, and Families, works closely with BWCH on issues such as family planning, teen pregnancy prevention, and preventive health care for women. Major initiatives include the development and implementation of activities for Women's Health Week and staffing the Governor's Commission on the Health Status of Women. The State Early Childhood Comprehensive Systems Grant is integrated into the new Arizona Early Childhood Development & Health Board, which administers First Things First. First Things First, with its community partners, will work to build a system that grows and sustains a coordinated network of early childhood programs and services. The charge of First Things First is to design a system in which programs and services are of high-quality, easily accessible, and affordable by all who wish to access them. The Board and First Things First were the result of a voter initiative that raises funding for early childhood services through a tax on tobacco.

Field Level Notes**1. Section Number:** Performance Measure #7

Field Name: PM07

Row Name:

Column Name:

Year: 2007

Field Note:

The source of immunization data is the CDC National Immunization Survey (http://www.cdc.gov/vaccines/stats-surv/nis/tables/0607/tab03_antigen_state.xls). Previously, the reported rate represented the coverage level for 4DPT, 3OPV and 1 MMR only, because data were not reliably available for the full series recommended by the CDC, which also includes 3 doses of Hep B and 3 doses of Hib. No data were available for this measure for 1998, but the data points for 1999 forward have been changed to reflect the full 4:3:1:3:3 series. Performance objectives were also changed to reflect the change in the measure. Estimates for data points are based on reports for the following date ranges:

1999 = July 1998 through Jun 1999

2000 = "2000"

2001 = Jan 01 through Dec 01

2002 = Jul 01 through Jun 02

2003 = Jul 02 through Jun 03

2004 = Jul 03 through Jun 04

2005 = Jan 04 through Dec 04

2006 = Jan 05 through Dec 05

2007 = Jul 06 through Jun 07

The 2007 estimate reflects the immunization status of children by age two for children who were 19-35 months of age, born between July 2003 and December 2005. The estimate tolerates 5.4% error at a 95% confidence level.

2. Section Number: Performance Measure #7

2004 = Jul 03 through Jun 04

2005 = Jan 04 through Dec 04

2006 = Jan 05 through Dec 05

The 2006 estimate reflects the immunization status of children by age two for children who were 19-35 months of age, born between February 2002 and July 2004. The estimate tolerates 4.2% error at a 95% confidence level.

Field Level Notes**1. Section Number:** Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2007**Field Note:**

The data reported are estimated from 45 of 49 birthing hospitals. There are now 49 reporting hospitals; 48 birthing facilities and 1 children's hospital that provide screens to neonatal intensive care unit infants. All sites voluntarily screen and are mandated to report data weekly. Although 97,986 infants were screened prior to hospital discharge, another 475 were given an initial screen as part of outpatient services. This occurred because some infants were transferred prior to screening.

2. Section Number: Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2006**Field Note:**

The rates of newborn hearing screening from previous years were based on a combination of reported screen results and inferred rates from non-reporting screening sites. Due to the promulgation of rule this year, requiring providers to report newborn hearing screening results, the newborn hearing screening rate for 2006 is based on actual reported data from all birthing hospitals.

Newborn Screening Rules were approved in April 2006. Two of the 47 birthing hospitals began reporting after the rules had been approved. Two hospitals began birthing services during 2006. Of the 47 hospitals 102,095 babies were born (Vital Records) and 98,363 were screened before discharge (HI*Track).

3. Section Number: Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2005**Field Note:**

The data reported are estimated based on 44 out of 46 birthing hospitals. While all 46 birthing hospitals have universal screening programs, reporting to the ADHS is voluntary, and not all report. Among the 88,150 births at these 44 hospitals, 86,604, or 98.2% were screened. The best estimate of the numerator for this measure on a statewide basis is 98.2% of all births: 96,487 x .982 = 94,750.

The State of Arizona does not have a survey like PRAMS that would collect data related to smoking during the last 3 months of pregnancy. The only data available is from the birth certificate, which records whether or not the mother smoked during the pregnancy, but is not specific to the last 3 months of the pregnancy. Therefore, the percent reported is the percent of women giving birth in 2007 who smoked at any time during pregnancy.

Prior to the 2008 application year (the 2005 data point), the indicators in this measure were determined by taking the number of fetal deaths and induced terminations of pregnancy greater than 20 weeks gestation plus infant deaths less than 7 days divided by live births plus fetal deaths. For 2005 forward, the indicator for this measure is determined by taking the number of spontaneous fetal losses greater than 28 weeks gestation plus infant deaths less than 7 days old divided by the live births plus fetal deaths. Data for 2006 are not yet available. The estimate for 2006 is provisionally set at the 2005 rate until data become available in the Fall of 2007.

LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: AZ FY: 2009

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce teen pregnancy and increase women's access to reproductive health services
2. Reduce obesity and overweight among women and children
3. Reduce preventable infant mortality
4. Reduce the rate of injuries, both intentional and unintentional
5. Increase access to prenatal care among the underserved
6. Improve oral health of children, especially among high-risk populations
7. Integrate mental health with general health care
8. Educate families, providers, and child-serving agencies on eligibility rules and processes for accessing services
9. Increase access to available and appropriate services for children and youth with special health care needs
10. Increase the recognition of families as integral partners in the care of their children's health and wellbeing

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: AZ

SP # 1

PERFORMANCE MEASURE:

Proportion of low-income women who receive reproductive health/family planning services.

STATUS:

Active

GOAL

To improve the health status of women of childbearing age (15-44 years).

DEFINITION

Numerator:

Number of women of low economic status (at or below 200% of federal poverty line) age 15-44 who receive reproductive health and family planning services.

Denominator:

Number of women of low economic status (at or below 200% of federal poverty line) age 15-44.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

9-1

Increase to at least 70% the proportion of all pregnancies among women 15-44 that are planned.

DATA SOURCES AND DATA ISSUES

In an effort to provide a timely and reasonable estimate of the need for family planning services in Arizona, the Arizona Family Planning Council conducts an annual needs assessment. The needs assessment compares the number of low-income women who are potentially in need of family planning services (women 15 through 44 with an income at or below 200 percent federal poverty level who are fertile) to the number of these women reported to receive free or subsidized family planning services through publicly funded resources. Publicly funded service networks work collaboratively with Arizona Family Planning Council to provide data for this report.

SIGNIFICANCE

Publicly funded family planning services are provided through Title V, Title X, AHCCCS, county governments, and federally-funded community health centers. Services include birth control and other vital health care services to low-income women and teens including breast and cervical cancer screening, screening and treatment for STDs, HIV and pregnancy testing and counseling, comprehensive physical exams and other primary health care services. Often, family planning clinics are the only source of primary care for women. The 2002 National Survey of Family Growth found that many pregnancies continue to be either mistimed or unwanted. Three fourths of women 25 through 44 years of age intended their pregnancy, while less than one fourth (22 percent) of women under the age of 20 indicated that their pregnancy was intended. For those women under the age of 20, 57 percent said that the pregnancy was mistimed and 22 percent said that it was unwanted.

SP # 2

PERFORMANCE MEASURE:

The percent of high school students who are overweight or at-risk for overweight.

STATUS:

Active

GOAL

Reduce the percent of high school students who are overweight or at-risk for overweight.

DEFINITION

Youth Risk Behavior Survey calculates body mass index from students' self reports of heights and weights, and categorizes them using CDC criteria as normal, underweight, overweight, and at-risk for becoming overweight.

Numerator:

The weighted number of students classified as either "overweight" or "at-risk for overweight" in the YRBS.

Denominator:

The weighted number of all students in the Youth Risk Behavior Survey.

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

19-3

Reduce the proportion of children and adolescents who are overweight or obese.

DATA SOURCES AND DATA ISSUES

Youth Risk Behavior Survey calculates body mass index from students' self reports of heights and weights, and categorizes them using CDC criteria as normal, underweight, overweight, and at-risk for becoming overweight.

SIGNIFICANCE

The National Health and Nutrition Examination Survey found that there has been an increase in overweight 12-19 year-olds from 5% to 16% over the last 40 years. While maintaining a healthy weight is important for people of all ages, being overweight during childhood can carry life-long health consequences. The Surgeon General's Call to Action to Prevent and Decrease Overweight and Obesity states: "Risk factors for heart disease, such as high cholesterol and high blood pressure, occur with increased frequency in overweight children and adolescents compared to children with a healthy weight. Type 2 diabetes, previously considered an adult disease, has increased dramatically in children and adolescents. Overweight and obesity are closely linked to type 2 diabetes. Overweight adolescents have a 70% chance of becoming overweight or obese adults."

SP # 3

PERFORMANCE MEASURE:

The percent of preventable fetal and infant deaths out of all fetal and infant deaths.

STATUS:

Active

GOAL

Reduce infant mortality by reducing the percent of preventable fetal and infant deaths.

DEFINITION

Using the CDC Periods of Risk Model, excess deaths will be identified by comparing death rates of various subgroups to infant death rates of White women age 20 and older with more than 12 years of education.

Numerator:

Total number of excess deaths identified by the Periods of Risk analysis.

Denominator:

Total number of fetal and infant deaths.

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

16-1

Reduce the fetal(fetal deaths at 20 or more weeks of gestation) to no more than 4.1 per 1,000 live births, and reduce the infant mortality rate to no more than 5 per 1,000 live births.

DATA SOURCES AND DATA ISSUES

Arizona infant and fetal death certificates will be matched to birth certificate data using the CDC Periods of Risk Model. Deaths will be classified into periods of risk by weight and gestational age at the time of death, and excess death rates will be calculated by race/ethnicity, age, and education level.

SIGNIFICANCE

Although infant mortality in Arizona has declined, disparities remain in the rates of death among various subgroups of the population. African American, American Indian, and Hispanic infants die at higher rates than White infants, as do infants born to less educated women and teens. While not all infant mortality can be prevented, disparities suggest that interventions directed at excess mortality within high-risk populations provide an opportunity for further progress.

SP # 4

PERFORMANCE MEASURE:

Emergency department visits for unintentional injuries per 100,000 children age 1-14.

STATUS:

Active

GOAL

To reduce the rate of emergency department visits for unintentional injuries among children age 1-14.

DEFINITION

Numerator:

The number of outpatient emergency department visits for non-fatal unintentional injuries and poisonings for children age 1-14.

Denominator:

The population of children age 1-14.

Units: 100000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

Injury/violence Prevention Objective 9

Reduce emergency department visits caused by unintentional injuries to no more than 111 per 1,000 people.

DATA SOURCES AND DATA ISSUES

All acute-care hospitals in Arizona, with the exception of federal hospitals (military and Indian Health services), are required to submit emergency room utilization data to the Arizona Department of Health Services twice a year. The population of children age 1-14 is based on the Arizona Department of Economic Security population projections.

SIGNIFICANCE

Injuries, both intentional and unintentional, are among the leading causes of death among children of all ages in Arizona. Unintentional injuries, homicides, and suicides accounted for 79% of all deaths among children 1-14 and 75% of deaths among adolescents age 15-19 in 2003. In addition, there were 6,874 inpatient hospitalizations for non-fatal injuries and poisonings. Thousands more less severe injuries are seen in emergency rooms as outpatients.

SP # 5

PERFORMANCE MEASURE:

The percent of women entering prenatal care during their first trimester in underserved primary care areas.

STATUS:

Active

GOAL

To increase the percent of women entering prenatal care during their first trimesters in underserved primary care areas.

DEFINITION

Underserved primary care areas, for the purpose of this measure, are defined as areas in which fewer than 74 percent of women received a prenatal visit within their first trimester in 2003.

Numerator:

The number of women in underserved primary care areas who received a prenatal visit during their first trimester of pregnancy.

Denominator:

The number of women in underserved primary care areas who delivered a live birth.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

16-6

Increase the proportion of pregnant women who receive early and adequate prenatal care to 90%.

DATA SOURCES AND DATA ISSUES

Arizona birth certificate data contains information that allows it to be aggregate into primary care areas. Birth certificates will be the source of both the numerator and denominator for this measure.

SIGNIFICANCE

Prenatal care is an opportunity to identify risks and mitigate their impact on pregnancy outcomes through medical management. Prenatal visits also offer an opportunity for education and counseling on proper nutrition and risk factors, such as smoking and alcohol use during pregnancy. Prenatal care is more effective when women enter care early in their pregnancy. There are many areas of the state where the percent of women entering prenatal care early lags behind the statewide average.

SP # 6

PERFORMANCE MEASURE:

Percent of Medicaid enrollees age 1-18 who received at least one preventive dental service within the last year.

STATUS:

Active

GOAL

To increase the percent of high-risk children who receive preventive dental services each year to 57%.

DEFINITION

Numerator:

Line 12B, "Total eligibles receiving preventive dental services," sum of columns "1-2," "3-5," "6-9," "10-14," "15-18."

Denominator:

Line 1, "Total individuals eligible for EPSDT," sum of columns "1-2," "3-5," "6-9," "10-14," "15-18."

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

21-12

Increase the proportion of low-income children and adolescents who received any preventive dental service during the past year.

DATA SOURCES AND DATA ISSUES

AHCCCS produces an annual "Form HCFA-416: Annual EPSDT Participation Report for Funding Source: Title XIX" containing dental utilization data, including information on preventive dental services.

SIGNIFICANCE

U. S. Surgeon General David Satcher deemed dental disease the "silent epidemic," yet, it is preventable with early intervention and the promotion of evidence-based prevention efforts like dental sealants. In an effort to improve health and well being it is imperative that we target interventions at preventing dental disease, especially in high-risk children. Although children enrolled in Medicaid are fully covered for dental services, they often fail to receive preventive dental care.

SP # 8

PERFORMANCE MEASURE:

Percent of children and youth with special health care needs who have access to service.

STATUS:

Active

GOAL

Increase the number of children and young adults who are receiving services.

DEFINITION

Percent of children and youth with special health care needs who have access to service.

Numerator:

Number of children and young adults under age 21 who are known to have received services through OCSHCN programs, including enrollees of CRS, FRC, AzEIP, and people who were known to be linked to other services through the SSI project and other OCSHCN information and referral activity, and those who received services through the Newborn Screening Program and were not enrolled in CRS.

Denominator:

Number of children and young adults under age 21 who are estimated to live in Arizona. Number of residents under age 21 times the percent of children under age 18 who are estimated to have a SHCN by the SLAITS survey.

Units: 1 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

16-23

Increase the proportion of Territories and States that have service systems for children with special health care needs.

1-4

Increase the proportion of persons who have a specific source of ongoing care.

DATA SOURCES AND DATA ISSUES

Denominator: SLAITS data and Arizona Department of Economic Security population estimates. Numerator: Program data from CRS, FRC, Newborn Screening, AzEIP, OCSHCN information and referral, and the SSI Project.

SIGNIFICANCE

Children with special health care needs and their families require a range of services including preventive and primary health care services, behavioral health services, social services, enabling services such as transportation, and transition services. Different eligibility criteria, duplication and gaps in services, inflexible funding sources, and poor coordination among service sectors create a challenge for families to identify, obtain, and coordinate the care and services they need.

SP # 9

PERFORMANCE MEASURE:

Percentage of state MCH programs that formally incorporate screening for behavioral health issues.

STATUS:

Active

GOAL

To increase to proportion of MCH programs that utilize screening tools behavioral health issues.

DEFINITION

The percentage of state MCH programs formally incorporate screening for behavioral health issues.

Numerator:

The number for state MCH programs that screen for behavioral health issues.

Denominator:

The number of state MCH programs that address behavioral health issues.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

All Bureau of Women's and Children's Health (BWCH) program managers report the use of behavioral health screening by state MCH programs under their supervision. Additional data is received from non-BWCH programs that receive Title- V funding.

SIGNIFICANCE

During the Needs Assessment public input called for the integration of behavioral health screening into state MCH programs to address both the physical and behavioral health needs of Arizona's women and children.

Year: 2006

Field Note:

The provisional estimate for 2006 was incorrect. The case population included children 1 to 6 years of age. The revised "final" estimate for 2006 includes only children 1 to 5 years of age. Problems with hospital discharge data prevented reporting on this measure for 2002.

Year: 2006

Field Note:

Data for 2006 not yet available. Estimates for 2006 are provisionally set at the 2005 rate until data becomes available in the Fall of 2007.

HEALTH STATUS INDICATOR MEASURE # 04B

The rate per 100,000 of nonfatal injuries due to motor vehicle crashes among children aged 14 years and younger.

	2003	2004	Annual Indicator Data		2007
			2005	2006

Denominator	1,261,764	1,300,444	1,347,557	1,390,127	

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

FIELD LEVEL NOTES

1. **Section Number:** Indicator 09A
Field Name: HSIRace_SingleParentPercent
Row Name: Percent in household headed by single parent
Column Name:
Year: 2009
Field Note:
The percent in household headed by a single parent data are from the 2000 Census.
2. **Section Number:** Indicator 09A
Field Name: HSIRace_TANFPercent
Row Name: Percent in TANF (Grant) families
Column Name:
Year: 2009
Field Note:
Percentage of children in TANF families is for July 2006-June 2007. Percentage is calculated as the average number of recipients per month divided by the total population of children 0-19 in the state. Native Hawaiian is included in "Asian" category.
3. **Section Number:** Indicator 09A
Field Name: HSIRace_FoodStampNo
Row Name: Number enrolled in food stamp program
Column Name:
Year: 2009
Field Note:
Number of children enrolled in food stamp program is for July 2006-June 2007.
4. **Section Number:** Indicator 09A
Field Name: HSIRace_WICNo
Row Name: Number enrolled in WIC
Column Name:
Year: 2009
Field Note:
The 2007 WIC enrollment count was calculated using a revised code that eliminated duplicates. The code that was used for 2006 data did not account for category changes that occur in the WIC program and therefore resulted in duplication of enrollees. The correct total for 2006 using the revised code was 235, 737 participants from 0 through 19 years of age.
5. **Section Number:** Indicator 09A
Field Name: HSIRace_JuvenileCrimeRate
Row Name: Rate (per 100,000) of juvenile crime arrests
Column Name:
Year: 2009
Field Note:
Native Hawaiian is included under Asian category.
6. **Section Number:** Indicator 09A
Field Name: HSIRace_DropOutPercent
Row Name: Percentage of high school drop-outs (grade 9 through 12)
Column Name:
Year: 2009
Field Note:
Percentages reported are for the 2005-2006 school year. Hawaiian is included in the Asian category.
7. **Section Number:** Indicator 10
Field Name: Urban
Row Name: Living in urban areas
Column Name:
Year: 2009
Field Note:
The proportions living in various geographic areas from the 2000 Census were applied to the total Arizona Department of Economic Security population estimates for 2007 to estimate the numbers living in various geographic areas.
